

Country
+ id: PK
+ name: CharField(50)

Institution
+ id: PK
+ name: CharField(100)
+ abbreviation: CharField(10)
+ badge: ImageField
+ description: TextField
+ url: TextField

IDs are not required. They are redundant in such a 'model' (and also in the Django model) because they are just representations of the associations (with their cardinalities)

is located in
You need to use descriptive phrases as they will end up in the code generated by Django. Better phrases will lead to more readable code.

don't articulations relate to both ANU + Inst. programs?

is this an ANU or other program??

Program
+ id: PK
+ code: CharField(50)
+ name: CharField(100)
+ year: IntegerField
+ url: TextField
+ duration: IntegerField

Articulations
+ id: PK
+ year: IntegerField
+ modified_time: DateTimeField

creates

last modified by

User
+ id: PK
+ name: CharField(100)
+ password: CharField(20)
+ email: CharField(50)
+ url: TextField

Don't really need this in model

How can this be?

Articulation
+ id: PK
+ undergraduate_option: BooleanField
+ completed_years: FloatField
+ transfer_info: CharField(50)
+ anu_complete_years: CharField(100)
+ requirement: CharField(100)
+ hidden: BooleanField
